Alpenlogic AG - Company Profile 2026

Digital transformation and applied AI for Swiss organisations.

Who we are

Founded in Zurich in 2016, Alpenlogic AG helps public bodies and mid-sized companies modernise their processes and put artificial intelligence to productive use. We combine strategy consulting, software engineering and managed operation of cloud platforms.

What we do

Main activity: digital transformation consulting and development of AI technical solutions.
Secondary activities: operation and support of cloud platforms (managed services) and professional training.

Our team

Total headcount (June 2026)	28 people
Higher professional training	14 (university degree or higher vocational diploma)
Professional training	9 (federal VET diploma)
Other staff and apprentices	5
Location	Pfingstweidstrasse 31, 8005 Zurich (head office, single site)

Quality and security

Alpenlogic AG is certified to **ISO 27001** (information security) and **ISO 9001** (quality management). Certificates are renewed after annual surveillance audits.
